

DFS - Corner Guard Request for Quote

Directions for using this form:

1. Please use one form per type of corner guard required. (See selection of corner guard profiles available from DFS.)
2. Decide which type of corner guard is suitable for the type of impact in your area.
3. Determine height required for adequate protection and measure all areas that require wall guards and come up with a total linear footage.
3. Each section should have a top cap. If installation is not flush with floor surface bottom caps are available. Keep this in mind when you're taking off your material and enter a total number of top and bottom caps needed.
4. Finally, submit your request and we'll send back a quote ASAP!

How quickly do you need this quote? ASAP Same Day Next Day
