

DFS - Handrail Request for Quote

Directions for using this form:

1. Please use one form per type of handrail required. (See selection of handrail profiles available from DFS.)
2. Measure all areas that require handrails and come up with a total linear footage.
3. Each section should start and end with a return. Keep this in mind when you're taking off your material and enter a total number of returns needed.
4. Count total inside and outside corners required and enter them. For some profiles, 135 degrees inside and outside corners are available, so let us know if you need them.
5. Brackets and splices are included in the cost of the handrails, so you don't have to figure out how many you need.
6. Finally, submit your request and we'll send back a quote ASAP!

How quickly do you need this quote? ASAP Same Day Next Day
